DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-5, drawn to a method, classified in class 164, subclass 34.

II. Claims 6-12, drawn to an apparatus, classified in class 249, subclass 91.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus can be used to make a piston.

3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

4. During a telephone conversation with Mr. Michael Catania on June 23, 2004 a provisional election was made *without* traverse to prosecute the invention of group I, claims 1-5. Affirmation of this election must be made by applicant in replying to this Office action. Claims 6-12 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

EXAMINER'S AMENDMENT

Art Unit: 1725

5. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Claims 6-12 have been canceled, since applicant had elected to prosecute claims 1-5 *without traverse*. However, applicant may file a divisional application for the canceled claims.

6. The following is an examiner's statement of reasons for allowance:

The prior arts of record fails to teach a combination of placing the ceramic core with the wax protuberances into a second mold cavity, the second mold cavity having a shape complementary to a desired exterior of the golf club head, the plurality of wax protuberances properly positioning the ceramic core in the second mold cavity; injecting wax into the second mold cavity, the wax adhering to a majority of the exterior surface of the ceramic core and to the wax protuberances, forming a shell over the wax; melting the wax to form a gap between the shell and the ceramic core; and casting molten metal into the gap to form the golf club head.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
